## Gift Card: E-Gift/E-Wallet/Mag Card

**REQUIRES PART  
2726128**

The App Suite gift card software module supports standard magnetic stripe cards\* through the POS or the Appsuite Loyalty Manager app. Additionally, the gift card module has support for E-Gift cards, which can be sold virtually on your website and sent to recipients electronically by email. Finally, customers can link a gift card to their profile to create an electronic wallet or E-Wallet. Once connected, the e-wallet can be used for purchasing through the mobile app via scan at the counter; or in full-service locations the check can be paid out to the e-wallet via the Appsuite POS plug-in. Customers can manually reload the card or set it up for auto-reload by linking a credit card to the account for balance replenishment at predetermined levels.

*\*See Appsuite Hardware Product Datasheet: Branded Magnetic Cards for information about Appsuite's custom designed and branded magnetic gift and loyalty reward card offerings.*
